

INDUSTRY SPECIFIC NEEDS (RAILWAY)

Our work over many years has seen us conduct multiple metro rail network audits (whole of network) traditionally by foot.

Our data entry and analysis work for these networks for the pro active removal teams commonly lead to many large scale arrests and hundreds of incidents being resolved through rail and local police.

Our designs of the TRIPWIRE V3 and now the sniffer units add to our stable of tools and experience in what we can offer a network afflicted with constant rail asset vandalism.

Whether it is simple asset live apprehensions on sub stations or junction houses through to whole train sets and stabling yards, we have the experience, safety training and dedication to meet the tasks set.

Our ability to bring together multiple agencies police and cities to partner with rail in a seamless approach to apprehending common shared offenders is straight forward and thorough.

We welcome any enquiries regarding apprehension works, audits and data entry between these victim groups and promise continuous excellent results.
