

### **INDUSTRY SPECIFIC NEEDS (Schools, infrastructure, sundry)**

Our work within schools and within sensitive locations such as water storage property, power company yards and substations sees a mix of various crime types occurring.

We can work in a reactive manner for school thefts (equipment), copper theft from power company yards and other sensitive locations such as water storage locations.

With offenders using the latter to cultivate drug crops, illegally fish or poach, the scrub type nature of these sites was no real challenge for our deployment team.

Theft of laptops and equipment in schools along with general vandalism, arson is common. We tend to work in these sites on special request from local Police within the Cities we work in as problems arise.
