

**NEW RELEASE DEC 2014**

### **TRIPWIRE V 3**

After 7 years of developing the V1 and V2 units which have seen hundreds of interactions with all manner of minor and major offences, we are pleased to announce our latest development, the Tripwire V3.

Our day to day use in the field sees us always searching for new ideas and options we would like for our own use and for our clients and we feel the latest offering ticks all the boxes no matter if you want short term or permanent deployments.

- Multiple mode options. Image only send, Images and video grab, video grab only, two way video call.
- Have 1 -10 images sent on activation with set time gap between images.
- Have 1 or 2 images as an alert then a 5-60 second video grab sent through.
- Have a 5 – 60 second video grab only sent upon triggering.
- Triggering by IR sensor to 80' in ideal conditions.
- Cable away trigger sensor head in standard model for flexible deployment opportunities.
- Make a video call to the unit while unit is in active mode allowing live watch of activity.
- Instant GPS tracking of unit if taken or disturbed. Reporting mapping and gps every 60 seconds.
- Periscope mode. Attachment allows unit to be buried on its back and viewer attachment used.
- Daily reporting to home with image, battery condition, and signal strength.
- Full 3G connection.
- Low cost plans starting as low as \$10.00 per month for low use.
- Complimented by new Infrared range at night and color by day.
- Solar connection for permanent installations.
- Standard casing or full tailoring options available to specific needs via in house 3D printing abilities.
- OTA capability – Over the air programming changes of your units from your desk top or PDA / smart phone
- Flexible power modes to conserve power. Awake, sleep and deep sleep.
- Flexible 7 day operational times to suit busy day time locations such as parks, schools, lanes, skate parks etc
- 1 - 4 recipients to all inbound alerts, images and video

Whether we provide your 24/7 primary monitoring locally or interstate or, for those who are international, we suggest that one key recipient be nominated and or a secondary monitor option such as the Police station watch house or station as a back up.

Primary recipients are typically handed a dedicated live feed handset which is handed across at shift changes.

**Be sure to watch the Tripwire V 3 clip on our website. It goes through all the various new features and options.**
