

WHOLE OF CITY / WHOLE OF NETWORK FIELD AUDIT SERVICE (no deployments)

Our audits are the key integral first step for any City or Rail network to be 100% prepared, aware and knowledgeable about their current graffiti and anti social behaviour issues.

Many cities make decisions, put into play components and try methods without full understanding of what's really occurring at street level. Our audits are not just a simple count. They bring about a realisation for City administrators and their respective law enforcement to make the best affirmative steps forward to bring real change.

The audit launches a city to a new level of awareness. Where a city may previously focussed on incoming information from its own removals, it harvests every single incident, fully loading the database for all concerned.

Our audits include the following

- A full street to street, drain to drain, park to park coverage with no location missed or ignored.
- Full gps photography of every tag, piece and mural regardless of age.
- Full documentation of owner type, correct size, estimated age, structure type, medium used, surface type etc.
- Full reading of graffiti, linking and association builds between crew, gang, other.
- Identification of top 30 offenders or those most damaging to the City in preparation for future deployments.
- Identification of perfect sites for future deployments and Police interactions.
- Full presentation of findings for City and respective Police and specific assessment for future options.
- If requested, assessment of current spends Vs options to reduce costs, afford aesthetic improvements etc.
- Full provision of reduction success likelihood if full offender reduction set in motion.

Post audit inclusions

- Access to GRIP database for 12 months for your City staff and Police.
- Training on fundamental database use.
- Free use of GRIP app for contractor and or in house team.
- 1000 fully analysed reads from removal works via app to our analysts.
- Ongoing support, advise and report generation for law enforcement upon arrests.
- Open sharing and offender evidence building between our other cities, transit or Road clients where cross boundary offenders are apprehended.
